Jack,

Leave the document alone even if there is an error, it happened to me once, it errored out but it retried and sent it out. I reset my fax machine, it did not happen again. Also i switch between fax machines, i have 3 of them, only one of them occasionally gives me the error, so try it out...

JaCk wrote:

Already check it too...  
Only a warning

"An error was encountered while sending a fax. The service will attempt to resend the fax. If further transmissions fail, please verify that the phone line, fax sending device, and fax receiving device are working properly. Sender: . Billing code: . Sender company: . Sender dept: . Recipient name: newFax. Recipient number: XXXXXXXXXXXX. Device name: Lucent Win Modem.

For more information, see Help and Support Center at <http://go.microsoft.com/fwlink/events.asp>.

Can you check the event logs?  
Open command shell, type eventvwr.exe and check in Application section for any Fax events.

Unfortunately, the error occurs after the fax submit, so the only thing  
I can read is on the "fax monitor" window:

"Dialing XXXXXXXXX

Sending Page 1 of 3

An error occurred while sending the fax"

I lookup on the Fax Console and the Extended Status is set to "Fatal  
error"!

:S

I've try it with a text file and everything works fine.

I'm gettin gout of ideias to get it working...

Many thanks

Jorge Colaço

Can you let us know the error code? Also, are you able to  
send a text file  
successfully to the same number?

Thanks.

Renu

Hi guys.

I'm working on a c# fax server project and  
I'm trying to build a tiff  
document that I can send to my fax/modem.

Re: fxscorex.dll sending tiff document

Have reading lot of information on the last weeks, and already have a tiff with these properties:

- 1bpp indexed format
- Width 1728 pixels
- Horizontal resolution 204 dpi
- Vertical resolution 196 dpi

By now, after execute the ConnectedSubmit() method, the fax/modem connects to destination and start to send, but when star to send first page it get's an error and abort the operation!  
:s

Weird... does anyone knows how can I solve this problem?  
Many thanks!

Jorge
