In news:%23\$6aunFEHA.3448@TK2MSFTNGP09.phx.gbl,
Craig Hackl <craig.hackl@saskatoonhealthregion.ca> posted their thoughts,
then I offered mine

> *i don't think it's on the 2003 side, since from the nt 4 domain, i can*
> *completly browse and do whatever i want on the 2003 domain, the only*
> *problem is when i am on the 2003 domain, trying to give permissions to*
> *the nt 4 domain users...*
> *so i think it's something in the nt4 domain that is preventing me from*
> *reading the domain user list...*
>
>

Not sure if this has anything to do with it since funcitonal level usually
deals with what sort of DCs are part of the domain and whether certain group
and other features are available, but curious, what mode is the W2k3 domain
in? Maybe trying to add someone or group from the NT4 side into a Domain
Local Group may not be allowed but rather into a Global Group? Just hashing
out some ideas....
