| I have two PCs. And older desktop with 2000 (and two hard drives) and a
| newer laptop with XP home.

|

| My question is twofold.

|

| 1) Should I "upgrade" the 2000 machine to XP to be consistent among the
| machines? Or leave the 2000 machine alone as long as it's working for me?

* No, not for this reason alone.

| 2) If I install XP on the 2000 machine, will I lose all applications
| currently installed on that 2000 machine? What about data files (I think
the

| only data files I have on the O/S drive are the Outlook Express files that

I

| would want to keep)?

* An upgrade would preserve your applications and data. Always have on hand
a backup of anything you can't afford to lose.
