Hi:

Thanks for the info, I am a desk top support, re-wanna be, so I am going though my computer and view access's file (the event viewer and history reader and such, trying to expand my knowlegde. So when I see something I have not before I like to find out what it is all about. The one thing I can not seem to find infor about is the discreptency between a history file saying a file was access for X amount of time before another was and the surcurity audit showing a much shorted time. Or a file being open (showed by the Event viewer) but not shown by the history reader.

--

Thank you for you help
