Starts and runs quite well on my W2K 256MB box. There are many of extensions available; I recommend the PrefBar highly. Put a Clear Cache button right there in front of you, if that may be your problem.

<http://prefbar.mozdev.org/>

Also see this page: <http://www.webmasterview.com/browsers/> and scroll down to "config.trim\_on\_minimize". Maybe setting this to false will help your speed.
