Hi everyone,

Not sure if this is the right group but I couldn't see other more appropriate groups.

I am using the keyboard mentioned above on a Dell machine. Unfortunately this machine does not have a PS/2 jack, so I'm using a PS/2->USB adapter.

At the moment the machine does not recognise the keyboard as a multimedia one, hence all the extra buttons don't work! Has anyone successfully solved this problem before?

TIA,
D.

DanyWu
