Help!

We came into the office this morning and one of our Windows 2000 PC will not boot. We get a blue screen error during boot that says:

STOP 0X0000007B (0XFCDAD030, 0XC0000032, 0X00000000, 0X00000000)
INACCESSIBLE_BOOT_DEVICE

We do not have a bootable virus checker disk and the machine will not boot into safe mode.

Any suggestions beyond a rebuild?

Thanks,
Brian
