| have a 2K SP4 box that I can't get back into. During the install
| process, the first ID was created as "First M. Last-D" . After using
| this
| ID, which automatically logged in, for about a month, I created a second
| ID
| "Firstname" for a co-workser to use. Now when the original id is tried,
| it
| says the username or password isn't correct.
|
| I did login with the second ID and check the spelling of the name and
| reset
| the password but still couldn't login.
|
| This system is not part of a Domain, just a stand alone box. How do I
| login
| using the ID "First M. Last-D" again? No matter what I type, it doesn't
| like it.
|
| Thanks
|
