Hi,

Today I did installed the windows update as stated below on both of my Windows 2000 Server:

1. KB 899588
2. KB 896727
3. KB 890830
4. KB 899587
5. KB 899591
6. KB 896423
7. KB 893756

Â

After the installation and restart, I discover that the both of servers were running very slow, the network connection icon no longer show and symantec antivirus auto-protection was disable.

Please advice ASAP. Thank You very much.

Mann

.
