Revoke the users SeSystemtimePrivilege right.

Use Group Policy

Computer Configuration / Windows Settings / Security Serttings / Local Policy / User Rights Assignment
to remove their Change the system time right

or

Use NTRights.exe from tip 6705 » What are the free Windows Server 2003 Resource Kit tools?
in the 'Tips & Tricks' at <http://www.jsifaq.com>

```
ntrights -r SeSystemtimePrivilege -u Users
```

or

```
ntrights -r SeSystemtimePrivilege -u DomainName\UserName
```

and use group policy to run it in a startup script for each client.
