Whatever!

I personally will create an image of my system as a backup... to me, it is the best way to backup your system.

Thanks anyway.

"Vincent Xu [MSFT]" <v-xuwen@xxxxxxxxxxxxxxxxxxxxxx> wrote in message news:qqD6wJ8dGHA.220@xxxxxxxxxxxxxxxxxxxxxxxxxxxxxx

Hi JCO,

I think following statement is necessary:

Please note that Microsoft do not support cloned or ghosted systems that were not deployed following the support Microsoft process. Please see

the

following for more information:

298491 How To Use the System Preparation Tool (Sysprep.exe) to Perform

Disk

Duplication

<http://support.microsoft.com/default.aspx?scid=kb;EN-US:298491>

302577 How to use the Sysprep tool to automate successful deployment of Windows XP

<http://support.microsoft.com/default.aspx?scid=kb;EN-US:302577>

828287 Unsupported Sysprep scenarios

<http://support.microsoft.com/default.aspx?scid=kb;EN-US:828287>

Sysprep is a tool that is designed for system administrators, Original Equipment Manufacturers (OEMs), and others who must automatically deploy the Windows XP operating system on multiple computers. After you perform

Re: Explorer.exe – Application Error

the initial setup steps on a single computer, you can run the Sysprep tool to prepare the sample computer for cloning.

I'll appreciate your understanding

Best regards,

Vincent Xu

Non of these options worked, however, I restored from a previous

Image...and

now in the process of re-installing all of my
Programming/Development
software.

Thanks for the help.. I should be done by midnight.

Assuming you have IE6:

How to Uninstall Internet Explorer 6
<http://support.microsoft.com/?KBID=293907>

How to reinstall or repair Internet Explorer
and Outlook Express in
Windows XP
<http://support.microsoft.com/default.aspx?scid=kb;EN-US;318378>

(The article is written for XP but the registry
information for
HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Active
Setup\Installed

Components

applies to Windows 2000 also.)

John

JCO wrote:

I've already deleted the
uninstall files for IE,
therefore, not sure

how

to

reinstall. My CD will detect
that it is the same or new,
therefore,

will

not re-install it.

I believe I have to go to the
Registry somewhere and
change the name

of

the

folder.. to trick the computer
into thinking IE is not
installed.

But I

can't remember where to do
this. Any other suggestions
as to how I

should

go about to do this.

Also, I tried different
memory and get the same
error message. I do

believe

your correct in stating that
the IE browser needs to be
reinstalled.

Can't say
for sure it
could be,
but I would
think
though that
the
imaging
software
would give
you an error
message or
somehow or
other
inform you
that it
couldn't
copy files
because of
disk
corruption
or
other. I
mean, it
would seem
unlikely
that the
software
would copy
broken files.
On the other
hand if the
operating
system was
broken

when

Re: Explorer.exe – Application Error

you imaged
it, well you
will get a
broken OS
on the new
drive.

John

JCO wrote:

Thanks,
I
will
do
that.
Any
thoughts
to
what
I've
said
about
using
an
image
software
on
a

harddrive

that
is
known
to
have
issues.
Can
this
corrupt
the
image?

Re: Explorer.exe – Application Error

Explorer,
the
two
programs
are
tied
together
like
the
Gordian

Knot.

Windows
Explorer
cannot
run
without
IE
and
nowadays
a
large
number

of

problems
and
error
with
Explorer.exe
are
actually
caused
by

Internet

Explorer.
IE
sneezes
and
Explorer.exe
has
a
heart
attack.
