I've never seen this in any OS before.

Daily cold boot.

Noticed during the day, time of day in the System Tray is 24 hour format.

This is a change,

Checked in Time Adjust screen, Time of day is correct as 12 hour format, Time Zone is correct, Day/month/year all OK.

I used a util to check time, my system time is accurate.

So the system reads 12 hour format, yet displays as 24 hour format.

Advice?

ms

Thanks, John, that did it.

Yesterday I installed nothing, ran nothing of significance., normal shutdown.

Re: Time format has gone incorrect

Re: Time format has gone incorrect

What could have changed the setting that has been constant for years?

ms
