>>Currently we have within our Group Policy for Windows  
>>Server2003, a policy that sets the default homepage for  
>>all users. This is currently applied in our default  
>>domain policy. The issue is that users can still change  
>>their homepage settings, however, when they log off and  
>>log back on, It's supposed to reset their homepage to  
>the  
>>one we've specified. The Problem is that the homepage  
>>isn't resetting itself like we have defined in our  
>>policy. It's like they're not getting the policy. You  
>>can, however, run the command (gpupdate /force) on the  
>>users workstation and then the homepage will reset  
>itself

>>to the one we specified. Any help is appreciated.

>>

>>-Thanks-
