Thanks for your support

However I put this domain member server to the same OU as other member server, but other server is applied GP from domain, but this server. When I run gpresult.exe, it shows:

The computer is a member if the following security groups:

BUILTIN\Administrators  
\Everyone  
BUILTIN\Users  
NT AUTHORITY\NETWORK  
NT AUTHORITY\Authenticated users

for other server, the groups list above have domain....

Thanks again  
Chi
