Hi

Thanks for the tip. That would probably be quite handy, though the school principal asked me to do as I told on the earlier message. I'm just a trainee here and having kinda hard time with this project right now :P

Any solutions?

> *You could enable quotas on their roaming profiles... at my school (at least where I used to go) they quota'ed us at I believe 2 or 5mb per user. I believe if you have IE5 on the computers, you could set the Internet Pref's via GP to make the temp internet files folder 0m, and quota the individual profile folder to a generous 10mb.*
