Hello,

Why is it that my Default Domain Policy does not work unless it is Enforced rather than Enabled. If it is Enabled, the GPO on my DC that takes place is the local DC Group Policies. When I Enforce the Default Domain Policy, then the Domain Policy overrides the Local DC policy. Why is that? I don't see the need of Enforcing the policy when the Domain Policy overrides the Local Policy. Doesn't it? Any help will do.

Jimmy K
