I'm using Windows 2000 server and have XP sp2 desktops and redirecting Mydocs/AppData/Desktop to \\server\userfiles\mydocs, \\server\userfiles\appdata, and \\server\userfiles\desktop, respectively.

One issue I have is when users first log in and during the initial synchronizing occurs, their desktop icons (except system ones) and quicklaunch toolbar icons disappear.

After the syncing is done, pressing F5 will show the missing desktop icons, and hiding/reenabling the quick launch will make those icons appear again.

I'm thinking it is a too restrictive permission error somewhere, but can't figure out which one it is. I'd appreciate any tips...

The permissions on \\server\userfiles\ are:

Sharing

Everyone Full Control

NTFS

Administrators – Full Control – This folder, subfolders, and files  
CREATOR OWNER – Full Control – Subfolders and files only  
Everyone – Read and Execute – This folder, subfolders, and files  
SYSTEM – Full Control – This folder, subfolders, and files

And on \\server\userfiles\mydocs, \\server\userfiles\appdata, and \\server\userfiles\desktop:

Sharing

Everyone Full Control

NTFS

Administrators – Full Control – This folder, subfolders, and files  
CREATOR OWNER – Full Control – Subfolders and files only  
SYSTEM – Full Control – This folder, subfolders, and files  
Everyone – Special – This folder, subfolders, and files  
(Everyone special permissions:

## Redirected folders, Desktop icons/Quicklaunch disappears after log in

- List Folder / Read Data
- Read Attributes
- Read Extended Attributes
- Create Folders / Append Data
- Read Permissions
