Howdy Craiga!

Craiga wrote:

> The way that I have currently installed it, when I try to open the software under their login it comes up with an 'access denied to file.....' error message. If i change the user to an administrator it opens it fine??

You need to grant the users the right ntfs−permissions to access the files, the software needs. Maybe "filemon" from sysinternals.com will help you.

cheers,

Florian
