Good luck with a "repair install," assuming you mean a W2K CD repair install.

I'd wait before trying that, since you'll probably have massive Win Updates, and other updates.

If the only problem is blurred icons, wait and look for more solutions. I assume you've checked Display Props> Visual effects>, as well as > Appearance>.

I haven't seen a problem like this before. I suspect that something in the OS specific to icons has gotten corrupted. A repair install might be the only practical way of fixing it.

Only icons are blurred.

Rest of the things are fine

Open
Device
Manager,
navigate
to
the
display
adapter,
then

r-click

it
and
pick
properties,
then
driver,
and
then
pick
"Rollback".
