Hi Samantha,

If the 2 LANS can access the Internet, you are in great shape and don't have to buy anything else. You can create a VPN tunnel between the two LANS and share resources.

308208 HOW TO: Install and Configure a Virtual Private Network Server in
<http://kb/article.asp?id=Q308208>

If the 2 LANS do not presently have Internet connectivity, then you will need to obtain whatever hardware it will take to make those connections to the Internet first before creating the VPN tunnel.

Hope this helps,
Gary

'--'Hi,
```

'--'

'--'I will like to join 2 LANS that are miles apart. In very
'--'basic terms what hardware do I require, for example
'--'routers, bridges, gateways etc. And what is the difference
'--'between a router and a bridge? And this there a website
'--'that will make clear all this? Thanks

'--'
