Oli,

I like to ditch the w98 machine but unfortunately we can't as the accounts ppl use it to fax things across on a modem, and there isn't any modem drivers for it when it comes to win2k

Interesting suggestion about deleting the PWL files, I can do that but then you go onto a duggest login in as a blank user/pass. This is not exactly what I want to see happen as users will not be able to use the network printers from the machine to print reports as well.
