: I have a win2000 pro in the network. It has a strange situation is that:

- : 1. It can access the network drive in the server but can't add the printer at that server.
- : 2. I can ping the DNS IP but can't ping the URL.
- : Actually, I have use the DNS that provided by ISP.
- : How can I test it to find out the problem....thx

Rick...

Nothing on the LAN should be pointing to the ISP's DNS servers except for a forwarder in the DNS server settings.
