I did work on a few cases like this. I think the article is clear, especially Tunnel setting. try to use netdiag to troubleshoot it.

Quoted form <http://www.ChicagoTech.net>

How to use Netdiag to view the policies of IPSec/L2TP

Without an active IPSec/L2TP connection, you can use netdiag to view the policy of IPSec/L2TP, for example, netdiag /test:ipsec /debug.
