Hello,

I am still having trouble connecting to the internet from the Client.

>From the Host it's no problem.

Deinstalling and reinstalling NetBui doesn't seem to have any affect. I still had the problem with the Host not being able to ping the itself, so I experimented with the Norton Firewall settings. Under Network (Firewall) when I added every know address suddenly the Host could ping itself, but not he Client – reversed roles ! So I deleted the Firewall altogether and now both machines can ping themselves and each other – Eureka ! However, believe it or not, the Client can still NOT access the internet.

Does this indicate where the problem could now lie ?

Is there a program that could be blocking this access ?

Is there a bloody setting within IE for either the CLient or Host machine that could be blocking the connection ?

Does "IP Routing Enabled" only on the Host and not the Host have anything to do with this ?

Any ideas where to go from here ?

Windows 2000 IP Configuration – CLIENT

Host Name : second
Primary DNS Suffix :
Node Type : Mixed
IP Routing Enabled. : No
WINS Proxy Enabled. : No
Ethernet adapter Local Area Connection :
Connection-specific DNS Suffix . :
Description : 3Com Etherlink 10/100 PCI TX NIC 10/100
(3C905B-TX)

Physical Address. : 00-50-DA-D2-53-DC
DHCP Enabled. : No
IP Address. : 192.168.0.254
Subnet Mask : 255.255.255.0
Default Gateway : 192.168.1.110
DNS Servers :

LAN, but no Internet Connection

Windows 2000 IP Configuration – HOST

Host Name : computer
Primary DNS Suffix :
Node Type : Broadcast
IP Routing Enabled. : Yes
WINS Proxy Enabled. : No
Ethernet adapter Local Area Connection 2:
Connection-specific DNS Suffix . :
Description : 3Com Etherlink 10/100 PCI TX NIC 10/100
(3C905B-TX)
Physical Address. : 00-50-BA-5D-C8-92
DHCP Enabled. : No
IP Address. : 192.168.0.110
Subnet Mask : 255.255.255.0
Default Gateway :
DNS Servers :
