Hi − you've posted this same message all over the place − I know I replied to at least one. Please don't multipost − if you need to post to multiple groups, it's best to crosspost instead, by posting a single message to a small handful of relevant groups (separate the NG names with commas) so that everyone can follow the thread, and it doesn't look like you're asking people to waste time answering questions others have already volunteered to help you with. See http://www.blakjak.demon.co.uk/mul_crss.htm. Thanks. :)
