Except, you don't actually have any kind of backup really, other than massaging the InCtrl report data as I understand it. If you really have a backed-up copy of the system SOFTWARE hive, then another technique might be used/useful. Details on your (other post), "I have backups of hklm and hk_users that I made 5 hours before the problems with Inf-tool." may be helpful.

Yes.

> Supposing that I feed the hklm and hku backups into

I don't quite take your meaning on the above.

> the registry, what happens with ControlSet003 and 004 ?
> Should I delete them ?

No. Ignore all that and if working in a ControlSet area stick with the CurrentControlSet.

Re: From an InCtrl report to a .reg file

See:

HKEY_LOCAL_MACHINE\SYSTEM\Select\

for reference if you are not already familiar with that key and contents.
