>> *NetBIOS over TCP/IP (NetBT) may be disabled on the client computer*

Maybe I need some help with how to do this. I have "Internet Protocol (TCP/IP)" installed and I see no other Win2000 or WinXP computers on the Network. I added the "NetBeui Protocol" on 2 Win2000 workstations and they now see each other but they do not see any WinXP machines in the Workgroup. Where is this NetBT which I need to enable?? Thanks for your help.
