

Cannot reformat E drive

I need to reformat my E drive but Windows 2000 is giving me an error "Windows cannot format this drive: quit any disc activities..."

I have nothing else open. I thought perhaps it was Undelete (from Executive Software) preventing the reformat so I have removed it. Still the same problem. There is nothing in the recycle bin.

I have reformatted this drive before (NTFS @ 512bytes) and have been using it for video files but I want to increase the allocation size.

Any suggestions will be greatly appreciated.

Thanks,
George
