

Why does RD session become locked after some time of inactivity?

Why does an active RD session go into locked computer mode (as if the user had pressed Ctrl+Alt+Del and then clicked Lock Computer) after several minutes of inactivity? Is this interval configurable?

We are currently migrating from a Windows 2000 server to Windows 2003 server using RD (server is colocated at our ASP). Is this auto-locking a feature of Terminal services or does it affect the console login as well?
