Hi,

I've been looking on the MS site and can't find what I need.

We have several machines that are running WinNT and Win2k without an internet connection. We'd like to get these machines current with all the fixed MS has issued. Downloading the latest service pack is obvious and easy enough. How can we get the critical updates, security fixes, hot fixes and everything else we need? Is there one file that can be downloaded with all the fixes? Without knowing exactly what fixes we need, it is like looking for a needle in a haystack at the MS download site. Thanks.

Regards—Michael G.
