Yes, you should be able to do so.

While I'm no expert on the subject, what Group Policy does, is push a configuration set out to your clients.

And this configuration is entirely registry based (at least the SUS part is).

Here's a couple of pages describing how to do it:

<http://support.microsoft.com/kb/328010>

<http://www.winguides.com/registry/display.php/1241/>

<http://web.mit.edu/ist/topics/windows/updates/explanation.html>
