hi, i deleted all the .NET passports after going into managing my accounts, but, it still doesnt work, it STILL shows me the number of e-mails somehow. Also, i downloaded tweak UI, but when i try to open it,an error comes up telling me that "tweakUIPowertopSetup_ai64.exe is not a valid win32 application". So ... yeah its totally messed up thanks for the help though, do u know how to make tweakUI work on my comp or other methods of getting rid of this e-mail thing

Thank you so much ... so far .. haha
