I have been trying to connect to my ftp server through IE and receive this message " An error occurred opening that folder on the ftp server. Make sure you have permission to access that folder. Details: the operation timed out.

I am able to login, here is the strange part. On my Windows 2000 pro and 98 machines I have no problem. Both my XP pro machines give me the same message. I selected use passive ftp and that did nothing. Also, I disabled the Windows firewall.

Any ideas out there?

Thanks,
Ray
