| Hi

| -When I try to open some XML pages, It shows that there is an error on the page, and I get this message:

| The XML page cannot be displayed

| Cannot view XML input using XSL style sheet. Please correct the error and then click the Refresh button to try again later.

| -----
| Error opening input file: '<http://schemas.windowsupdate.com/iu/resultschema.xml>'. Access is denied. Please check processing resou...

| -And When I go to : '<http://schemas.windowsupdate.com/iu/resultschema.xml>'

| The page opens as follows:

| - <Schema name="schemaItems" xmlns="urn:schemas-microsoft-com:xml-data" xmlns:dt="urn:schemas-microsoft-com:datatypes">

| - <AttributeType name="name"><datatype dt:type="string" /></AttributeType>

| - <AttributeType name="itemID"><datatype dt:type="string" /></AttributeType>

| -When I go to help and support : "XML Page Cannot Be Displayed" Error Message When You Open An XML Attachment in E-Mail :

| SYMPTOMS

| When you attempt to open an Extensible Markup Language (XML) document attached to an e-mail message, you receive the following error message in a Microsoft Internet Explorer browser window:

| The XML page cannot be displayed.

| Cannot view XML input using style sheet. Please correct the error and then click the Refresh button again later.

| Access is denied.

| CAUSE

| This behavior occurs if both of the following conditions are true:

| The .xml file is attached to a Microsoft Outlook or Microsoft Outlook Express e-mail message.

| -and-

| You attempt to open the .xml file attachment either by double-clicking the attachment or by right-clicking the attachment and then clicking Open.

| When you open an attachment in an HTML or XML-formatted mail message, the attachment is placed

microsoft.public.windowsxp.basics: Re: Help on:The XML page cannot be displayed !!

Temporary Internet Files folder on your computer's hard disk, and Internet Explorer opens the file from that location. Internet Explorer is unable to load .xml files from the Temporary Internet Files folder as a result, when you attempt to open an .xml file attachment from an Outlook or Outlook Express e-mail, you receive the message described in the "Symptoms" section of this article.

| WORKAROUND

| To work around this issue, save the .xml file attachment to another location on your hard disk, and then open the file from this location. To do this, follow these steps:

| Start Outlook or Outlook Express, and then open the message that contains the .xml file attachment that you want to open.

| Right-click the attachment, and then click Save As.

| In the Save Attachment dialog box, specify a name and a location in which to save the file, and then click Save.

| Close the message window.

| Start Windows Explorer, and then locate the .xml file that you saved in step 3.

| Double-click the file to open it.

| STATUS

| Microsoft has confirmed that this is a problem in the Microsoft products that are listed at the end of this article.

| MORE INFORMATION

| The Temporary Internet Files folder (Internet Explorer cache) is the location on your hard disk where Web pages and other files, such as graphics, are stored as you view them. This feature speeds up the loading of Web pages that you frequently visit or have already viewed, because Internet Explorer can access and load files from your hard disk instead of from the Web.

|

| -I opened OutlookExpress and I followed up But I've confused what to do and how to get it to work

| - Im using Windows XP Pro/DSL Connection/Internet Explorer 6 sp1/Outlook Explorer 6 sp1

| Please help me fixing this, cause I often use XML files

| Thank you in advance

| Sandy
