| I turned off XP System Restore prior to attempting removal of Sassen virus. I was then unable to  
back on. I have tried all of the fixes provided on this forum for turning it back on, to no avail.  
resort, I just tried to reload XP. While the CD was running, I got the following error:

|  
| "The signature for Windows XP Professional Upgrade is invalid: The error code is 426. The service  
been started. \*\*\* FATAL ERROR \*\*\* Setup failed to install the product catalogs. This is a fatal  
setup logs should contain more information.

|  
| Now what?  
|
