Have you don't major cleaning before trying to install.

Spyware Removal (free)
www.spysweeper.com

Ad-Aware SE (free) (Download, Update & Run)
<http://www.lavasoftusa.com/software/adaware/>

Download and Run a free virus scanner to double check your current one.
<http://www.mvps.org/sramesh2k/Scanners.htm>

Try to download it to a folder then disconnect from the internet and disable all virus & firewall software before going to the folder and downloading it.
