Hold everything!

<http://www.karenware.com/powertools/ptdirprn.asp>

This is from someone named Karen. I just downloaded it -- it produces a good text file, with all the info, etc. Lots of extra lines, but every line that contains a file name, etc., is prefaced with the word "File." Should be simple to isolate those lines in the file when importing stuff. Worth looking at.

Good luck!
