I have XP pro on a Computer now that seems to be giving me some trouble. I want to reinstall XP over and clean everything out. Now I want to keep the things in "My Documents" folder and "My Music".

I was thinking of Partitioning the exsisting drive and backup everything to that Partition and reinstall XP on the old one after deleting and formatting it.

\_SO\_CAN\_I\_DO\_THAT?\_

Second I have a Old gateway HD that I want to use. It has 20GB and I want to try and erase everything on it and use it as a SLAVE drive and Transfer the folder to that drive and reinstall XP on the master drive

[B]\_So\_Can\_I\_do\_that?[/\_B]

HELP me DO this Please
