How can I get rid of these? It's on all my NTFS-drives and it won't go away....

I've tried turning SR under Win+Break, both individually for the drives and totally, but no help

For example,
C-drive 20GB, it takes 28MB
D-drive 20GB, it's 0MB
F-drive 140GB it takes 2.5GB

I know it's not a lot, but I'd rather it didn't exist, as I don't use it...
