I'm going to try a 16x16 to see if it works.

Can someone tell me why my favicon does not seem to work. It is 26x32 bytes and is referred to by a link in the home page. I displayed it in IE, ended IE and restarted, but it still does not appear in my favorites.

<http://www.dcsi.net/~denmarks/index.html>

The favicon is <http://www.dcsi.net/~denmarks/graphics/favicon.ico>.
