Hi Rainy,

You're not talking about the Welcome screen logon, but rather the system logon at startup, yes? This one is on a black screen with white characters that offers which operating system to logon to? If so, this is a function of boot.ini, and indicates that you have two installations of Windows on the same system. Let's confirm this by having you enter C:\Boot.ini into a start/run box (or hit winkey+r), then click ok to open it in notepad. Copy/paste the contents into a response by clicking edit/select all/edit/copy, the paste the information into a response to this post by clicking in the message text area and hitting ctrl+v.

One on the top with my computer set up the way I did just recently current to today..
Two, the one on the bottom is windows set up in a previous state.. not sure
I can explain this.. I have windows XP HOME, is this the way everyone's

Re: Two Logons

is?

I don't think I want this, can I change it? Rainy
