Hi Ted
I think you are in the wrong newsgroup – well you have posted here from the web interface – if you have a virus problem, which appears to be a bit complicated, and you would like clear advice, then I would suggest here for your web discussion group.

<http://www.microsoft.com/communities/newsgroups/en-us/default.aspx?query=virus&dg=microsoft.p>

Or set-up in newsgroups where there is a dedicated group for viruses.

Rgds

I am using 3 virus checker;1=AVG Free 2=McAfee 3=Nortons.
2 Firewalls 1= Zone Alarm 2=R-Firewall
When I scan for viruses they all come back as clean (no

Re: Viruses?

virus) then I
get a
message telling me that I have an infected computer,with the
following
virus

:---

Trojan Horse Dialer DBZ exe

Trojan Horse Generic WUE SRVJJE exe

Trojan Horse Generis WUE SRVYT exe

I have treid to locate these as it tells me that they are in
documents &

settings\local settings\Temperory Internet Files\contents

IE5\3JHJY8TZ

(bgates(1)exe

IE5\U4H3JTOJ

IE5\W43S5AQ2

This is driving me crazy.How is this possible when I use the
above

??????

How can I remove them ???
