Teriel9

What about the original CD that came with the graphics card?

Hi Gerry,  
Tried that, message "no other drivers saved"  
Thanks anyway  
Teriel9

Another thought. What happens if you roll back the driver to

Re: nv4\_disp.dll problem

what it  
was before the problem started?

I have tried 3 different drivers all to no avail,  
can only use the  
computer in 800x600 mode by replacing the  
nv4\_disp.dll , if you wish  
I can send you a copy of the dll file I am  
using.  
The use of the computer is limited but I can  
do most jobs with it.

I have WindowsXP with  
SP2 and NvidiaGeForce 2  
MX 400HP. My  
identical problem with the  
continuous loop as yours  
started about  
a month ago. My event  
viewer informed me to  
update and  
unfortunately the update  
was also unsuccessful.  
I am still having the  
problem and at a loss on  
how to resolve it

Re: nv4\_disp.dll problem

I had a  
problem  
when  
nv4\_disp  
went into a  
continuous  
loop, I  
downloaded  
and  
replaced the  
file which  
cured that  
fault, now I  
get  
a "paging in  
a  
non-paging  
area" fault.  
when I  
replace the  
file and  
try to start  
windows  
normally  
the same  
fault occurs.  
I have  
scanned for  
viruses and  
found none.  
While in  
this state I  
can only use  
800x600  
resolution.  
Can anyone  
please help  
TIA  
Teriel9
