I have created a Windows  
partition on a MacBook,  
32GB in size.

I am trying to avoid filling it  
up with "bloatware"  
applications  
like  
Adobe Acrobat Reader. On  
my Mac, the Adobe Reader  
hogs 113.5MB of HD  
space. I replaced it with a  
freeware application called  
Skim, which  
takes only 9.3MB of HD  
space and is every bit as  
good, if not better,  
than Adobe Acrobat Reader.

Re: Freeware PDF Reader

Can anyone recommend a  
freeware .pdf reader they  
like to replace AA  
Reader on my Windows XP  
partition?

Many thanks.  
Carl

Adobe Digital Editions will do it. Requires  
Flash.

Foxit is highly regarded. I use it rather than the AA 80 meg  
piece of  
bloat.

Adobe Digital Editions is 3MB.

Adobe installed and working 7.59 MB – Foxit 3.92 MB

Size isn't everything;-)
