Model of digi cam?

HP 315.

Tried the other way, installing your digi cam software, as per
HP bumph.

The software was installed using the HP camera's CD. What is a bumph?
This camera and the MS wizard worked perfectly together for 23 months -
until I installed a critical update. But I don't know which one.

ie not relying on winxp to do it for you?

Not when we have CDs that come with hardware.....

FS~

Can someone please explain this in plain non-techie
English? My Microsoft
Camera and scanner Wizard no longer comes up when I
insert the FLASH-CARD
from my HP digital camera in the FLASH-DRIVE on my
PC. Nothing happens

now!

Re: MS scanner and camera wizard problem

It worked great for 2 years.

How do I get the wizard back so I can unload my camera using the

flash-card

in the flashdrive?

I have WXP-Home/SP2. I downloaded some XP security updates but don't know if they caused the problem.

Thanks.....
