Ive used the help menu to go to the "User Accounts" but a get a message saying "Fast switching is disabled ,Client services must be uninstalled from netware".

Can anyone explain how to do this? I've looked in Control panel to add/remove programs but can't fint this anywhere.

Thanks in anticipation.

Dan

Go to Control Panel and double click Network Connections.
Right click the icon for your LAN and select Properties.
On the General page, click on "Client Services for Netware" to highlight it and hit the Uninstall button.
Click OK and restart your computer.
You should now be able to go back to User Accounts and set up Fast User Switching.

Here's an article with more info:

Error Message When You Try to Turn On Welcome Screen or Fast User Switching
