Does it work if you log in as a different user with admin privileges?

"George Tseng" <GeorgeTseng@xxxxxxxxxxxxxxxxxxxxxxxxxxxx> wrote in message news:E31428C8-DC70-4D1B-AB9C-05ADB542A786@xxxxxxxxxxxxxxxxxxxx

After I installed some CAD tool, my notebook cannot enable hibernation anymore. When I check "Enable Hibernation" and click "apply", the check

mark

disappear.

I uninstalled the tool, and did system restore, and the problem still

remains.

I suspect it's a configuration issue. If I restart, and don't log in, hibernation is available at the log-in screen. However, Once I log-in,

the

hibernation option is disabled. And, if I log out, the hibernation option will remain disabled.

I am running XP SP2, and I turned off ICS. Please let me know what I should

do.

Thanks!
