Dave,

Change it here as well:

```
HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\Explorer\User Shell Folders
AppData = %USERPROFILE%\Application Data
Local AppData = %USERPROFILE%\Local Settings\Application Data
```

Similarly do the changes in "Shell Folders". The values are:

```
C:\Documents and Settings\\Application Data
C:\Documents and Settings\\Local Settings\Application Data
```

Reboot!

Ramesh

Checked and the value was't correct (pointing towards c:\windows). However I amended it to c:\documents and settings\username\application data, and this has not resolved the issue. On a reboot it changes it back to c:\windows again

Dave

>Visit www.dougknox.com, click 'Windows XP Fixes' and
look for the fix "Cannot Create Toolbar For..... error
message". Download the VBScript and double-click it.
Restart and now, try to enable Quick Launch bar.
