I stand by my answer.

I don't know why, but the View settings **are** different.

At least they are on my machine, XP Pro.

Using Windows Explorer in the Folders pane.

Desktop

[-] My documents

[+] My Pictures

View of My Pictures folder in right hand pane is Thumbnails.

Going further down...

[-] My Computer

[-] Local Disk (C:)

[-] Documents and Settings

[-] Wesley P. Vogel

[-] My Documents

[+] My Pictures

View of My Pictures folder in right hand pane is Details.

Get down funky.

Hope this helps. Let us know.
