Hello,

You may want to check this utility out which renames the files from the tags itself.

Hello all ... I think this topic belongs here.

Does anyone know of an easy way of changing the name of a number of different files or folders at the same time? For example, I have a CD Rip (legally obtained of course!!) and the MP3 file names all are in this format: (band_name)_ (album_Title)_ (TrackNumber)_ (Name_of_the_Track).mp3. Can I change the MP3 File names to this format: (TrackNumber) - (Name of The Track).mp3 without going in to change each file name individually? I.E., I would like to eliminate the Band & Album name from the file names, and change the underlines (_) to spaces (). I'd like to do the same to a number fo folder titles at once.

Is that kind of "batch" utility available?

As always, Thanks!!
